JOB DESCRIPTION:

Genesis Engineering Solutions Quality Department is seeking a quality inspector to conduct visual inspections of space-flight Harness hardware, ground support equipment and other components using an optical scope and other manual inspection tools verifying conformance to engineering drawings and/or specification requirements (NASA 8739 and J-STD-001). The Inspector of Quality Assurance duties in summary are to provide a highly visible role that will maintain, improve, and drive quality programs by identifying, addressing, and resolving quality requirements associated with delivering 100% conforming product primarily and services on time. Responsibilities include quality strategy development, process improvement, workflow management, quality control, and performance measurements. Inspector of Quality Assurance must embrace the responsibility of providing quality service that exceeds the customer's expectations. In addition to the above, the Inspector must provide support to production, customers, and suppliers and perform to the planning activities of potential, conceptual, current, and past orders within GES

RESPONSIBILITIES:

- Abide by quality standards (NASA 8739, J-STD-001) specifications, and requirements. Perform audits regularly as needed using best practice methods. Deploy quality-related activities set by the Quality Manager.
- Perform/Execute and document risks of quality, establish corresponding reliability/risk mitigation response plans established by management.
- Ensure client satisfaction meets or exceeds established goals, investigating and responding to customer complaints regarding quality when assigned by management.
- Inspecting products to the customers' requirements to assure 100% conformance prior to shipping.
- Follow all GES procedures related to quality ensuring defined goals are met and if not, documented corrective actions and Preventive Actions are generated.
